Thread: [I-Doser | My Gift To You | Free Binaural Beats \(Brainwave Entertainment\)](#)

Arsenic - April 12, 2017, 4:53 pm

Arsenic with another give-away.

First, what is a binaural beat? I asked my friend wikipedia and he said this:

Quote:A binaural beat is an auditory illusion perceived when two different pure-tone sine waves, both with frequencies lower than 1500 Hz, with less than a 40 Hz difference between them, are presented to a listener dichotically (one through each ear).[1] For example, if a 530 Hz pure tone is presented to a subject's right ear, while a 520 Hz pure tone is presented to the subject's left ear, the listener will perceive the auditory illusion of a third tone, in addition to the two pure-tones presented to each ear. The third sound is called a binaural beat, and in this example would have a perceived pitch correlating to a frequency of 10 Hz, that being the difference between the 530 Hz and 520 Hz pure tones presented to each ear.

In other words, a binaural beat is audio that, when listened to with high quality headphones, changes your brain waves based on which frequencies you listen to. They can make you calm, focused, energized, sleepy, etc. They change the way you think.

Ok cool, so what is I-Doser?

I-Doser is a brand of binaural beat. Think of them as the most well known artist of a particular genre of music, if that genre were binaural beats. I-Doser is known for using binaural beats and taking this technology to the extreme, with tracks like Cocaine, NZT-48, Bufo Toad, Lucid Dream, Peyote, Viagra, etc. Yes, they have essentially found a way to change your brainwaves to behave similarly to various drugs. YES IT IS SAFE and there is no risk involved.

[Check out I-Doser's website for a list of doses they have.](#) There are many different categories to explore!

Here's the catch. When you buy a dose from I-Doser, you buy a digital file that has to be opened with I-Doser's proprietary software in order to listen to the dose. The dose becomes locked after you listen to it. In other words: You buy the dose, you use it once, and then you have to buy another.

My Solution:

I rip the dose files into WAV files so they can be listened to on any platform as many times as you want Why wav? Because mp3's are too unstable for this. Trust me, I tried using mp3 as the file format and it corrupted the dose (the audio would stop playing unexpectedly).

I highly recommend the Confidence track. It helps me think calmly and clearly. Whenever my thoughts are racing this is my go-to dose. Prozium also does something similar. It is another flavor, if you will. Reset restores your brain to normal 8hz level, or normal and awake, which is also very useful to help you think clearly. Sleeping Angel is a great one to fall asleep to. Bufo Toad is one of my favorites for thinking creatively. Anyway, use the I-Doser link above to check out the full description for each dose.

How do you use the audio files?

You MUST wear headphones for the audio to work. You can NOT play them out loud on a speaker.

Lay down or get comfortable in a chair, close your eyes, and let your thoughts wonder. Yes, sometimes you can open your eyes, which I do occasionally when I'm doing work, but they work best when you have your eyes closed and you focus on your thoughts. I can personally tell its working when my thoughts are different from any other time in my recollection. In other words, your thoughts will become awesome and you'll have no idea how you can up with the imagery in your head. Also, your state of awareness will change.

The WAV files are huge so I have only converted a few. However, I can take requests. I have many other idoser files that I can convert, or if you want to purchase one from I-Doser I can convert it to a WAV for you.

Thank you sir. I'll be downloading them all once I'm on the universities high speed connection. Did you use Audacity to record the sounds from your audio card?

I use a specialized program. The kind a nerdy programmer releases to a handful of people when he gets bored. I suppose you can use audacity to record your sound card too - I hadn't thought of that!

You're very welcome!

I just added DMT, Insomniac, Peyote, Trip, and You Choose to the mediafire bank. (Uploading as I type this. approx 300 megs per wav file.)

Trip was my first dose. First, most memorable, and favorite. DMT is right up there with Peyote, Trip, and Bufo toad for creative, trippy thoughts. Insomniac helps a lot when I can't sleep. It knocks you out harder than sleeping angel, while sleeping angel puts you in an upbeat mood while gently putting you to sleep. You Choose is a lengthy track. "Sometimes you just want to dose until you feel good." The purpose of You Choose is to listen to it until you just feel good and you can choose when to stop listening. It sweeps from very low to very high frequencies.

Enjoy!

BigDickBandit420 - April 13, 2017, 7:00 am

I've had the desire to try DMT for 8 years. I'll report back.

BarefootOxford - April 13, 2017, 4:38 pm

Thanks for the shares, man. I'd love to see how their NZT product works, if you have that.

I do have the mp3 but from what I remember it is corrupt and stops playing about 3/4 of the way

through. I'll do my best to track down the original file I had and convert it. Will PM you when I have done so.

In the meantime, if anyone has a subscription to Google Music, I-Doser has some of their "CD" tracks on there. I-Doser has dose files as well as their CD audio files but the catch is that the CD tracks are shorter in length and do not work as well.

kalpan56 - April 15, 2017, 7:22 am

I used Bufo Toad yesterday. I am blown away. Seriously, one of most craziest audio ever heard. I had a very creative night indeed. I am going to try others. Let's see what DMT does. I will update you guys on later.

Thanks a lot Arsenic for sharing this jewels. This are amazing beats.

Can you suggest good headphones under \$80 for listening this ?

kalpan56 - April 15, 2017, 8:01 am

Can I request some doses ?

I use Sennheiser HD 280 Pro's. They are \$100, however. I can't recommend any other headphone under \$80 because I have no experience. Only recommendation - Anything but

Beats headphones.

I uploaded Confidence earlier. I'm about to upload Adderall and chakra for you I don't have the others that you linked to, but if you are willing to pay for them then PM me with the files and I will convert them for you.

I'm in the process of converting about a dozen more for you guys. Most of the idoser files in my mediafire have been downloaded 30+ times so I'm guessing a few of you like them

Arsenic - April 16, 2017, 12:28 am

I was not able to locate my original nzt file so I am not able to convert it to wav. However, I did find an old mp3 conversion. I cant recall if the file is corrupt or not (the song will stop before finishing and will restart.) Anyways, I uploaded the mp3. Let me know if it works or not.

Just added:

NZT (see above)

Beta

RAVE

First Love

Memory+

Marijuana

Hand of God

Gates of Hades

Orgasm

Quaalude

Xanax

The "alpha" brain state that people talk so much about... I dont care for it. It makes me focus inwardly too much. BETA brainwaves are where you want to be! Beta waves allow you to focus on whats going on around you and allows you to be in the moment. Alpha bad. Beta good. Alpha is more so for meditating.

RAVE is funny. it'll make you want to jump up and down to the music in your head. No, the techno music on your head wont stop and its kind of awesome. It gives you lots of giddy energy as well.

First Love... wow. Use at your own risk. It brings up memories of you and the first person you fell in love with. Your emotions and memories become very vivid and intense. If you want a trip down memory lane, go for it. Its a dangerous dose in my opinion.

Hand of God and Gates of Hades... use at your own risk. Look these up on idosersoftware.com

Don't mention it - I do it for the community I like the new sig DrChocolate. Mad props on that

collection!

I would love to hear about everyone's experiences with I-Doser. Its a fun little rabbit hole and parallels self improvement and self-help quite nicely. I discovered I-Doser many years before I ever knew about pheromones so I'm always around if anyone wants any help. Shoot me a PM or comment here. Cheers!

Noooo binaurals only work if you play them using headphones! Its the whole principle of different frequencies being sent to each ear that allows your brain to make changes in response to the frequencies. You may notice 'something' through stereo but the real magic happens when each ear is isolated Very curious to see how nzt with headphone effect you!

I tested 2 of the doser 1) DMT and 2)Bufo Toad.

1) DMT : I had high expectation on this. Maybe, it was because of my current headphones. I need to upgrade. I might be getting a new one from Europe soon. Will give it another try in future.

2) Bufo Toad: I listened to this twice. It has opened up my creativity. I can dream in day light. It is simply amazing Dose.

Testing some other stuff. Will update the result soon.

Thanks

DrChocolate - April 17, 2017, 12:53 am

Quicky.

NZT and chakra seems to have a long term usage to be able to gain results. Idoser site says the same. So I've started using it before bed and after I wake up. Last night I was a TIIIIINY bit tipsy. Not drunk though.

Chakra seems to calm me down and put me to sleep. NZT while me eyes closed, am having lucid dreams. Good ones. And automatically wake up after the track has run its course. I like it. (and that's on Samsung ear phones) planning to get a good quality set of head phones soon. will keep ya's posted.

Thanks.

kalpan56 - April 17, 2017, 7:15 am

Yesterday experiment :

- First Love: Well, it proved that I never been in love with anyone in my life. I think it is because of lot of work done previously. It was happy feeling while listening to this sub. I was very happy for next 5-6 hours. Extremely happy and childish. This was an interesting experience.

- Hand of God: The reviews for them intrigued me too try this out. I tried it before going to sleep. Sadly, pass out in 5 minutes. Don't remember much. Might give it a try again.

@drchocolate:

I think chakra dose will work better after meditation. It is on my to test list today. Hope to see some

difference.

Thanks.

Lol. That's affirmative mate. I was laying on the bed this time but. Without holding on.

DrChocolate - April 17, 2017, 9:20 pm

Quicky on NTZ;

So last night I was normal. Lol. Not tipsy. But really tired.

Am trialling amd experimenting with different volume levels. And high volume levels're good in me humble opinion. Also, didn't feel or see the lucid light dreams last night. On high volume. But I fell asleep on it with me ear buds on and woke up this morning. I got a few more affirmations tracks and they're on "all loop". Am defo feeling energetic.

Am very new to this binaural beats science. So I'll trial and error many different volume levels and different sitting, laying and standing positions to see if I can get different results. Also, I think eyes closed, is good for hillucination tracks? Am not sure. But with uppers I believe it doesn't matter if eyes're shut or not? Still learning and experimenting.

For the members with experience on binaurals, do u guys listen to it on high volume or low volume or medium? And with eyes shut and body still or with eyes open while working on other things? Am trying NZT while cleaning me car as I type this. Thanks in advance.

Arsenic - April 17, 2017, 10:28 pm

For best results:

Headphones are a must. Over the ear headphones, none of that apple earpod BS

Eliminate distractions. People, cell phone, etc

Lay Down and get comfy

Close your eyes. Keep them closed.

Put something over your eyes / turn off the lights

Meditate during the session. Zone out. Let your thoughts come to you. Don't zone out too much or you'll go to sleep.

Sometimes I have a coffee before I dose to make sure I don't doze off.

Volume: Lower is usually better. Half volume or less. Most doses start off soft and get louder within 3 minutes. However, each person is different so play around with it a little. For an extra bonus: Play a subliminal while you dose.

Edit:

I sometimes listen to the more energetic doses while I'm working and I'll keep them on loop. Yes it works but not as well.

DarkLord1 - April 18, 2017, 8:07 pm

Very nice contribution, Arsenic. I tried the NZT. Not sure if it's supposed to sound that way (like "wha wha wha" with some of static) because of your comments about MP3 formats, etc.

I will say that I feel very clear headed after NZT and in the zone a bit. I'm not ready to take on evil doers with my skills yet, but it's a nice start.

ShadowX114 - April 18, 2017, 10:02 pm

I tried marijuana while working, I didn't notice any effect. I guess I really should lay down eh? The problem with that is that I won't feel calm if I do that during the day because I will always feel that I should be working instead of "laying down" and "wasting time".

Ah so it does play all the way through, very good. Since it does play all the way through then no, it is not corrupt. The wah wah comes from the ears each listening to a different frequency (by design) and the static is white or pink noise which is meant to distract your thoughts as it changes and to block outside noise from being heard.

(04-18-2017 5:02 PM)ShadowX114 Wrote: [](#)I tried marijuana while working, I didn't notice any effect. I guess I really should lay down eh? Having to lay down and "waste time" has always been an issue for me as well. It's hard to make time. I find that doses which enhance alertness go well with working and any other dose is really meant to be taken time for to lay down and close your eyes.

DrChocolate - April 19, 2017, 3:41 am

I can second what Arsenic is saying. Earbuds don't work as much although it feels like something is happening inside the brain. Headphones're essential to achieve the best results.

I got a pair of Sennheiser for 120 Australian dollars and I can definitely see the results. NTZ is definitely working on me. I can second what DarkLord is saying. My results are similar to his.

Shakra is the other dose I'm trying these days. And it's looking positive.

Edit; Chakra. Not Shakra. Thabks.

Arsenic - April 21, 2017, 12:19 am

As per DarkLord's request, I uploaded Pheromone. Here is the description:

A pheromone is a chemical signal that triggers a natural response in another member of the same species. There are alarm pheromones, food trail pheromones, sex pheromones, and many others that affect behavior or physiology. Their use among insects has been particularly well documented. In addition, some vertebrates and plants communicate by using pheromones. I-Doser has created an external reverse pheromone, a breakthrough concept that attracts other through subsection: I-Doser gives you a steady dose of confidence, allure, and ecstasy. A fully complicated binaural formula that makes you feel more attractive. This natural sentiment will make you more attractive to

your allure through the quality you will emit after dose.

I have not tried it, but it seems like a confidence boosting sexualizer. Give it a try and let me know what it does for you guys.

Wow, thats wild. Very wild indeed.

Some users report a force of sorts sitting on their bed and then getting up repeatedly. I havent tried it in ages so I might circle back around to it.

I Uploaded an mp3 version of After Awake that I had laying around. It makes for a very peaceful, meaningful, purposeful day.

"AfterAwake was designed to be a first-thing in the morning dose as a soul cleanser, boost of unparalleled energy with no crash, and the tuning you need to have a successful and happy day. Precisely developed to be part of a daily dosing regimen, AfterAwake can be a vitamin for your mind and open pathways to supreme productivity. My test:

Hand of God: I enjoyed this a lot. It was fun to get some ancient knowledge. This is very interesting one. I am going to test this more in future. More focus attempts will help.

Chakra: I saw some flowers. This was an interesting to mix. I didn't trip at all. It was mostly internal journey. It did something. I don't know what.

Pretty interesting.

I ordered the SENNHEISER HD-280 headphones. It will take a week to deliver at my place. I will test again on them. One thing is true. This Doses works.

@drchocolate,

Go to 10 days Vipasana sibir. It will remove your fears from this kind of stuff. Only few people can handle intense spiritual experience. It is tough to be in void. It is difficult path indeed. Worth a try.

Ancient knowledge huh. Very cool

When you said you saw flowers with the chakra dose. My mind immediately visualized the 7 chakras. Perhaps you adjusted your brain's ability to communicate with the different regions of your body. I find that through meditating my brain and body sync up well, especially if I visualize the part of my body that I want to sync up. If that makes any sense.

You will not regret buying Sennheiser HD 280 pro's I've had mine for years. They very accurately reproduce music. You can hear all sorts of odd things in music that you never knew were part of the recording. I also use them for studio headphones while playing my electric drums and I find that they work a hell of a lot better than my brother's Bose noise canceling headphones, which are \$300. Very durable. Mine have seen some days.

As I type this, I am uploading the Speed dose. I will try it out for the first time after I pay my barber a visit today.

Speed's Description:

When we did a poll asking I-Doser users what they were looking for, many said they would love a pick-me-up for when days were sluggish. Our popular French Roast dose did the trick, but the emails still poured in. They wanted more, complete awake, aware, heart-pounding, spine tingling awake to REALLY get through a day (or, a night!) Here it is, perfected and FINALLY available after months of waiting: SPEED! Get: increased energy and alertness, a decreased need for sleep, euphoria, increased sexuality, and visual & auditory hallucinations. You must be aware this is more extreme than other wake-you-up doses, so it is recommended for only advanced users. VERY advanced users.

I have never had visual hallucinations from listening to a dose, but what I can say is that you very well may see things in your mind's eye that can be unusual. Think of it like brief moments of day dreaming. My 2 cents.

kalpan56 - April 22, 2017, 7:47 am

Update:

Luckily, I got my headphones earlier than expected. Well, I like it. It proves me that I am not an audiophile. This are good noise cancellation. It can be used at lot of places. In trains and other hated places. This is not a reviews of headphones. It is just a view on them.

What I did with the headphone?

Chakra: I played chakra again yesterday. It was out of curiosity. I was listening it while working. It felt smooth. After few minutes, I can feel a irritation in my throat. My throat felt like burning. It must be my closed throat chakra. I cannot communicate well in my life.

Hand of God: This took me by surprise. I played this laying on the bed. For 5 minutes, nothing much happen. Except for some realization. I thought of this as duh for next 15 minutes. As nothing was happening.

Suddenly, at 20 minutes, things got scary. I lost my senses. I was in a void. It was a dark place. And my body felt like X. I cannot move at all. My heartbeat was racing faster than I can describe off. The whole place around me was dark. All I can sense is my heart beat.

I can sense how little I am in the universe. My troubles means nothing to the universe. It was a feeling of deep emptiness and sense of being with oneself.

This was a very interesting 10 minutes for me. I woke up immediately after the music stopped.

I took a breath around and felt my surrounding. It was definitely soothing to see familiar stuff around. My throat felt choked. Took some water and rest for an hour.

Bufo Toad: This is my favorite till now. The most pleasurable dose till now. Took it after HOG. It made things fun and pleasurable. I enjoyed it a lot.

Going to test out HOG tom and other doses soon. Will report back.

Thanks Arsenic for the share. Definitely, worth exploration.

I second this. The fear is the same replicated feeling I had.

Also, after u mentioned it, about the heart Beat, that's actually replicated in me run too. Elevated heart beat.

Personally, from what I know, elevated heart beats can flip both sides. Good and bad. If I see a good friend o mine after a long time, especially if it's a chick mate, then me heart beat elevates and that's an elevated heart beat with a good feeling.

But let's say, if there's a benzine smell in the mine around stock piles, then that's a VERY scary feeling. That's the same feeling I got when I was listening to HOG.

I tried Hand of God. Sadly it didnt do much for me. Same story as with when I tried it years ago. At first I was seeing lots of cool imagery. An old time bazaar of people - thousands of people intermingling, as seen from a birds eye view. Then I saw myself on a lake guiding a canoe. All of a sudden the canoe began to fall downwards and sink into the lake, further and further down. I was underwater yet could still breathe. I felt like Avatar the last air-bender before he became frozen in ice. I became fearful but I embraced it. It was very dark and I was very cold.

For the remaining 20 mins I got nothing. As I type this I'm aware that I have a somewhat different understanding of the environment around me and I'm a little zoned out. I can see buildings and structures from a birds eye view in my minds eye as I type this, which actually is quite neat, but I was hoping for a bit more of a profound spiritual experience. For what it is its not bad however.

Arsenic,

You have given a powerful gift to the community. Thank you again for this contribution.

Here is something that I have found helpful and you may be already doing it and if so, please disregard.

1. Reset

2. Condition (available via the app for sure...not sure where else....description says that it may help the next dose work better) seems to really help.

3. Dose and repeat

I'm using all the other techniques that you put out. Couldn't recall if you played with the conditioning or not.

AfterAwake is as good as you said. Sustained energy levels and positive attitude no matter what happened. Brain+ and NZT seem to speed up my brain function. My recall has been better than it has in years.

The companies forum and customer service still has me shaking my head, but the products are very legit. Bravo again for the add and the continued support.

Works faster than Subliminals for me...which makes me curious what would happen if the two were combined.

I have not had a chance to play with Condition. The reason being that it, paired with a consecutive dose, takes a great deal of time which requires extra dedication to the cause. Today is a lazy Sunday - perhaps I'll give it a spin and listen to Hand of God afterwards I'm also curious what kind of effect it will have on doses that typically work well for me. In other words - I know the effect will be amplified so I'm excited to see the results.

Yes, please do combine them with subliminals!

I dose using my laptop. I play a supersonic sub from sub-shop on a very low volume as I'm listening to the dose. (2 separate media players.) If the sub is screeching at all then the volume is too loud. You can also use the trickling stream / masked subs in the background as long as the dose is still the center of attention.

@drchocolate,

Thanks for buying new doses. Definitely worth trying.

@Arsenic,

Hand of God worked for you. You had that feeling of darkness. HOG cannot go any further. In the darkness, you can find all the answers and truths. The darkness is very profound place to be in. You can read scriptures to understand that darkness. It is scary place but impacts profoundly.

Trying it won't give you better results. People exaggerate spiritual experience too. They are not some sci-fi stuff. They are very simple. We all have one but don't recognize them.

Please check your PM. Thanks.

Thank you Kalpan for sharing Chakra Muladhara (root) and Chakra Swadhisthana (Sacral)! I have converted both and added it to the collection for anyone to download.

I gave root chakra a spin last night. It was very... sobering. Very insightful and welcoming. I learned a lot about myself and my environment. I fell asleep for a time during the middle so I am looking forward to giving it another whirl. I feel much more grounded and focused today.

Here's one for ya.

When I was in high school... sophomore year I believe... I became very interested in lucid dreaming and out of body experiences. The lucid dream and out of body Idoser helped but I wanted more. I got the idea to loop Out of Body while I slept one night. I'll let you decide whether it was a good idea or not.

For the next few months I became more reserved. More thoughtful. More introspective. More analytical. I could step back and analyze a situation whereas other's would lose their cool. I found myself zoning out during the day and what came to my mind was unlike anything I had experienced before. Driving past a lake (passenger) my mind's eye would fill with images of the bottom of the lake. I would see rocks, trees, logs, fish. If I zoned out on a tree I could see the tree and its roots and rotate them as a solid figure in the space of my mind just like a 3D render. I could do this with buildings. I would see the building as a whole and then I could examine all the rooms on the inside like I was looking at a model. I could rotate the structure like I did with trees. I was able to do with with my entire high school building. I could do this with cars, electronics, etc - I could pull apart the layers of the electronic components.

Now - obviously I didn't become psychic. The renders I saw clearly were not 100 accurate, although they did allow me to think differently and understand objects as they take up space. Spatial understanding I suppose you'd call it.

To this day I can trick my mind into going into that mode. Sometimes it is helpful whether I want to think differently or If I just want to zone out and entertain myself.

plenty more where that came from

kalpan56 - May 16, 2017, 6:08 am

I listened to chakras dose many times. This has improved a lot of things in my life. For me, connecting to people has become easier and my roots has become very strong. My confidence in myself out of the roof.

Both the chakras has bought up lot of fears to me. Especially, related to my sexuality. I am not comfortable with my sexual thoughts. This become very apparent. I am working on this stuff. Now, it is not easy to deal with. Without this dose, I won't be able to aware of this problem.

Peyote is amazing for me. It is the best trip out of other dose. I see a lot of things. I am not comfortable mentioning my vision. As it is in the private accounts. You will find yourself flowing and lot of stuff happening around.

Basically, this works. I found this doses great. They are quick fixes though. You will not make permanent changes quickly. Maybe , after a month of regular use.

Thanks Arsenic for sharing this with me. I am not interested in many other doses. I am using the ones I liked. Here are them: Swadhistana chakra, Muladhara chakra, Peyote, and hand of God. This doses I try to use everyday depending on the time.

I am. Very freaky how they work. I haven't tried any of the drug ones, but the ones I have tried have worked....Maybe not as strong as I had hoped, but they did work.

I.E...The orgasm one didn't make me orgasm, but I did feel sexual pleasure from listening to the stream.

And my perception seems sharper with the ESP one, but you didn't hear about the dark lord winning the lottery, so there's that.

When I listen in this order to Reset, Condition and Specific dose, I get better, stronger results.

My movements (reaction time) and general thinking speed up with NZT. Chakras work really well in centering me.

ShadowX114 - August 31, 2017, 7:36 pm

DarkLord, by perception, do you mean 6th sense? Usually, I used to think the 6th sense thing is more in the "voodooish" side but over the past few months, my 6th sense has been happening a lot, I'm starting to be a believer.

Are you guys (Dr. Chocolate and DarkLord) listening to them by following the rules of being laid down with eyes closed or are you doing another method? When I used to listen to the subliminals by SubliminalShop, I used to do them in my sleep or while working (the raindrop track was helping me focus)

By perception I do mean 6th sense. It's not like I imagined....it's like I expect things and they happen that way and I'm not surprised by stuff. Not the lotto, but small stuff. It happens quite a bit.

I mostly follow the rules of laying down with an eye mask, but after awake and Nzt have worked for me while I'm up and moving.

I have done the Subliminals too and these effects are much more immediate than the Subliminals. I dose with the long mp3's and the short doses from the app on my tablet.

DrChocolate - September 1, 2017, 12:33 am

Me too. I lay down too. Consuming a cuppa coffee before laying down. Otherwise the binaurals put me to sleep and I personally think sleep is a waste of time. That's for binaurals. And for binaurals only I use my headphones. I went with Arsenic's recommendation of Sennheiser headphones and they work really good for me.

For subliminals I listen to them on my speaker phone. While am on the go (doing stuff) sometimes I pair it with my Bluetooth speaker when in the office. But when away from it, I put it on my speaker of the phone to the max volume.

I haven't tried the binaurals on the go yet. I need to try it. NZT is really good. I second D-Lord. It's making me quick with the thinking part of my brain and pattern recognition.

Hope this helps.

ShadowX114 - September 1, 2017, 1:10 am

Thank you for the replies! I will go through the list again and see which ones to try.

DssMaster - September 16, 2017, 9:00 am

Thanks Arsenic and everyone else who contributed in the sharing of these I-Doser audio files. I haven't yet tried them as of yet, because I want to get myself a good pair of quality headphones first. I have a pair of Sol Republic Tracks headphones, but they are a bit bass heavy. They do sound better than the Beats Solo, which are way too heavy on the bass for my taste.

I am thinking of getting a pair of the Sennheiser HD280 Pro. But I'm debating between that or a pair of the Bose QC35 which come with active noise cancellation and are wireless as well, but don't want to buy them without getting to try and see what they sound like first. If anyone here has had the opportunity to try the Bose QC35 as well as the Sennheiser HD280 Pro, would appreciate a comparison report.

Hello Kalpan56, I have Sony XBA A2 . But it goes above 20kHz, it's the phenomenal thing which gives you high and low frequencies like never heard before.

But there is this Zero Audio on Amazon costing around \$58, which is a Japan import. It's locally made in Japan. The model number is ZH-DX220-C. It is high resolution, perfect for generating the ultra high frequencies from these wav files. Lower frequency responses are awesome too.

I'll be blunt, I haven't went back to them yet. I kept procrastinating and seeing that it's been almost 2

months, it's crazy how time passes.

Anyway,

So last week, when I was talking to my mother, she showed me a clip she stumbled on. It was a Middle Eastern news report talking about the "danger of digital drugs". Since I wear my bluetooth headphones most of the time, and my mother knows that I used to listen to "things that relax me" (which are actually ambient music or nature sound), she got worried if I'm listening to those "digital drugs". They showed clips of people laying on the floor and acting aggressively to the hypnosis. They also showed a glimpse of the website by censoring the logo but it looked familiar.....it was indeed i-doser.com lol.

I assured her that's not what I listen to but just thought I'd share this story to you guys.

I found it on youtube. I think I'm the only Middle Eastern here but here it is nevertheless: [Youtube link](#)

They show the site at 1:23

They show reaction at 1:52

ok, after typing my whole post, I found an American version:

<https://www.youtube.com/watch?v=HGP5CqqeALo>

For those who tried it, what do you think of their reaction? This is still not going to stop me from trying the ones I'm curious to try (luckily none of them is related to illegal drugs)

BigDickBandit420 - October 18, 2017, 4:08 pm

Audio can be used to stimulate our brainwaves, for good intent, entertainment, or bad intent.

Look up sound therapy. 528hz is a healing frequency. Tibetan prayer bowls are another form of brainwave stimulation.

It has the potential to be used maliciously, for good, pure entertainment, and could also drive people crazy.

I think MKUltra used sound waves to affect people's brains too but I'm not 100% sure.

I'd stay away from the crazier stuff myself.

DrChocolate - October 18, 2017, 10:05 pm

I second Bandit. I haven't tried the DRUGS per se.

But am getting positive results from other good things on i-dosers.

My bad lol. I'm assuming you're from Lebanon, since it's a Lebanese channel and you automatically talked about politicians and said "our country" ?

I told her that, many times, the intention of what they show us is to make things more dramatic to create fear. And that's exactly what they did to her. She was really worried as if she is certain these are exactly what I listen to. I briefly explained to her about binaurals and as BDB said, I listen to things that are beneficial.

To tell you the truth guys, ever since she showed it to me, now I'm more inclined to try these illegal drugs! I have this curiosity mindset.

Hello Arsenic, reps coming your way...thanks for the additional files added to the folder. Is the Mediafire space a yearly membership? If so, perhaps members here can chip in so you can get/maintain a bigger space in order to fit the files in .wav format? The service that you are providing us by converting these files into a much better format is great to us all here taking advantage, and I think it's only fair we all donate a small portion to help this collection to be available.

If I can learn how to make the formatting of the files, I would like to help out, and upload it to the folder you have on Mediafire.

PM me if you would like to go that route.

Arsenic - November 27, 2017, 3:18 am

I'm not sure which route I want to go at the moment. Mediafire has 11G for free and I'm at 10.5 now. If WAV is truly an ongoing demand then yes I probably would need a paid mediafire account which is $\$5$ billed monthly, or $\$3.45$ per month if it is billed annually. If somebody wants to take on that payment then be my guest If thats the case then I am happy to migrate all the files and maintain wav / mp3 folders.

--inline edit--: My other thought is that with all that money, instead, we can buy more I-Doser's and make due with the mp3 versions. Not a bad tradeoff. ---

If not, then I will likely create a new mediafire under a different email address and only upload mp3's. When I listen to subliminals at subliminal-shop.com I always use the FLAC (basically WAV) format, but honestly with I-Doser I don't think it matters that much, maybe thats just me though. Side note, anyone who isn't using <http://subliminal-shop.com> and the forum (<http://subliminal-talk.com>) needs to get on that. They have a bunch of free subs. Realsubliminals are trash. Anyways, thats what I've been up to lately.

DssMaster let me see how this week goes. I may contact you soon, thanks.

DssMaster - November 27, 2017, 3:25 am

If Mediafire gives you free space per email address, then perhaps you can go that route and have

as many as you can possibly get, as each one reaches its limit. And yes you can contact me when you get the chance if you decide you want the help. Just need the info as to what program I need to convert them into the .wav format.

If somebody wants to take on that payment then be my guest. If that's the case then I am happy to migrate all the files and maintain wav / mp3 folders.

DssMaster let me see how this week goes. I may contact you soon, thanks.

I just seen the price from there website. They are expensive. How long does the download last from the site and if I purchased one could I email it or something to you?

If I remember correctly they are available for 6 months and you can download each file 5 times. The file is a DRG which is meant to be used with the I-Doser program on your computer. The doses are $\$2$ to $\$5$ a piece and some come in packs so they're really not that expensive (if you go this route). Download the DRG files from the website, upload them somewhere like mediafire, and PM me the link. I will convert the files to mp3 and upload them to my mediafire for everyone to use.

@ Arsenic; I tried AM 6 from subliminal-shop.com and I find it did not work on me as good as I had hoped. I tried it for the full recommended 6 months. Then I tried (Become The) Alpha Male from Real Subliminal, the one that was provided to PT members by as3, and I find that it worked on me better than the one from the subliminal shop. Also would like to note that I followed his recommendation to read the book as well. I don't think Real Subliminal is trash, perhaps they are just like mones; some products work really great on some/a majority of people, and not so good at all on others/a small minority. Not to mention that as3 tried the one from Real Subliminal himself as well, and did report on how much it contributed in his overall improvement.

I read reports on the subliminal forums from members that ran the full 6 months of AM6, to which did not work on them as well. I would like to try some of their other products, like SM and the experimental DMSI, but most of the other subs like SM supposedly only works if you successfully complete the AM6 module. I'm guessing that not only must it be completed, but also it must have worked on you in order to progress to others like SM. However, I don't think you need AM6 in order to use DMSI, as I haven't read anything that says that you do. Not sure what the current status is, development wise. Hence, the reason I haven't jumped on it. Would like your input if you have tried SM and/or DMSI.

Arsenic - November 27, 2017, 6:00 am

It seems possible that different products will work differently for each person. May I ask how you used AM6? ie hours per day, how many days did you listen to each stage, did you take breaks, did you use headphones or stereo, what volume, etc.

I have found that RealSubliminals tend to have more shallow yet more noticeable effects. What I

mean is that their scripts are so absurdly simple that it is easy for your mind to catch onto it, but they lack depth and do not stick very well. Their alpha male sub will have you running around thinking "yeah im the shit! I'm the alpha! people have to respect me!" But you'll lack any actual alpha qualities whereas AM6 from subliminal-shop will turn you into an alpha - developing self esteem, not needing validation from others, wanting to do your own thing, never having to prove yourself, a real alpha. My 2 cents. I am a bit biased as I am on subliminal-talk.com forums a lot but I do recognize everyone is different.

Arsenic, many many thanks to you.

I like I-Doser - i found a way how you can get the drg files that you have to work on any pc. that would reduce your upload space to max. 200 kb per sequence. with picture and description on every i-doser application. i could give you a tutorial, personal or in the forum. or you could upload the useless doses that don't work and I will make a pack that will work and give it to you.

What do you think about it?

Greetings

Arsenic - December 11, 2017, 2:32 am

Hey MarlonEee,

I'm glad you enjoy I-Doser and have found another solution for PC users. If you would like to post your method here then I'm sure other members would appreciate it and yes I am willing to upload your files into the repository.

Thanks

MarlonEee - December 11, 2017, 11:30 am

Hi at all, ok i write a tutorial now. Give me one or two hours. it would be great when you can share your working drg files with all - especially the new ones from 2016 and from november 2017. See you later. when we work together we can make the collection complete and in high quality, without converting to wav or the compressed mp3 files... I am happy. I want to help you.

MarlonEee - December 11, 2017, 12:12 pm

Hi all people, here is my tutorial to make the drg files work on every pc.

It is very easy Have Fun and Enjoy. I tested it on my laptop and used the drg file on my other desktop computer and it works 100%!!!

INSTALLATION:

First Thing you have to do is to download the software called "Drg-Author"

<http://drg-author.software.informer.com/download/>

After that, install the software. Now you have 2 shortcuts on the desktop. Delete the one without the administrator shield. Double click on the drg author shortcut with the Administrator shield.

Now there should be an error message about a missing file called 'comdlg32.ocx'. Click ok and download the ocx file from

<https://www.ocxme.com/download/3269/comdlg32.ocx>

write the captcha letters in the box and click "Click here to download your OCX".
Extract the zip file to desktop or somewhere. Cut and paste the downloaded comdlg32.ocx file in "C:\Windows\System\" folder (i have windows 10 64bit).

Now try to start again the drg_Author. Now there should be the next error message with a missing file called "MSCOMCT3N.OCX" Click ok.

Download this ocx file from

<http://www.mediafire.com/file/zm2mgzfhz2/MSCOMCT3N.OCX>

Put the MSCOMCT3N.OCX in the same folder like the other one ("C:\Windows\System\")

CONVERTING USELESS USED DRG FILES TO USEFULL DRG FILES FOR EVERY PC:

Start DRG_Author with administrator rights.

Open a drg file with a click on the grey button right corner "Open Existing DRG"

Delete ALL the numbers in the textfield right from the text "Custom Code".

Let everything how it is and click on the button in the right bottom corner "Build.DRG File"

Make a special folder for this drg files and call it with the same name like the original dose.

Now it should come a dialog box with the text "Drg Done Have fun". Click ok.

DON'T Open it now in I-Doser. First you have to compress it in a single zip file to make it useful for other computers. With software like WINRAR.

When you have done this, you can use the created drug file in your i-doser application on this pc. To do that, copy it (the created *.drg file) in the folder "Documents\Dose Files".

Now open the i-doser application and load the dose. Now it should work.

DONE. YOU MADE A GREAT JOB. Was easy, or? Share your clean (without custom code) drg files with us

(not the drg file you used, i mean the zipped (compressed) drg file in the .zip file

That will save upload space. Wish you a Nice Day.

MarlonEee - December 17, 2017, 5:42 pm

Ok, when it is too difficult, i could make the work for you all... Just need the useless .drg files that don't work on other computers. Merry Christmas.

Marlon

Just a quick question for anyone who's used 'social dominance' Binaural. Am being EXTREMELY horny the next day on this Binaural. Been replicated 4 times now. Anyone else seen the same effect? Thanks in advance.

masterfu678 - January 7, 2018, 3:00 pm

For me, I buy the DRG file from the website but also brought the premium version of the software, which has the ability to convert DRG files to mp3 in the software, which, obviously, you need to

convert them to mp3 first when you brought the DRG file and then decide if you want to use the DRG file or not. I usually just delete the DRG files and transfer the mp3 to my Nvidia Shield and listen to them on that device.

Also, my headphones is Wavez bluetooth headset, it is a fairly good headphone with good noise cancelling capability. I got it for free when I brought my new gaming laptop.

The company said on their website that if you want the DRG files in mp3 format, you have to use their own software to convert them, any other softwares will corrupt the mp3 file.

So yes, there is a possibility that your wav files had lost some of the original quality they had. I did reset, condition, after awake and then NZT, exclusively in that order, and now I felt a lot more sharp and intelligent than before. I also watched Limitless just to research what I should expect from the NZT file, and I could say I'm something like what Eddie is in the movie. Learning a foreign language is a lot more easier.

It might also be the Performix SSTi pill I took. It has fat metabolism and cognitive priming.

I'm planning to listen to the Attract Pack, the spirit sounds (telepathy, ESP, and clairvoyant), testosterone, and of course, pheromone.

I do still have the installation file for the premium version of the software, if anyone wants it, PM me.

masterfu678 - January 12, 2018, 7:50 am

So, here is my review of the doses I had listened to, remember that I did not download Arsenic's uploads, I listened to the ones that I brought and converted to mp3 with the official i-Doser software premium version. You are supposed to do that anyways if you want full effects, and if a file have no effects on your brain, there is a good chance that the file had been compressed to the point of having no effect on the brain, poorly translated, or just downright corrupted. As I said above, I still have the premium version of their software which can convert mp3s. The premium version of the software are \$20, but from me, it is free. All you have to do after installing that version of the software is get the doses, convert them to mp3 before listening to them in the software, and transfer them to your favorite playback device and listen to them again and again without spending anymore money on that specific dose.

Anyways

Reset and Condition: These are helper doses, Reset will get your brain back to the normal state, and Condition will get the brain ready for the next dose, nothing more need to say here.

After Awake: I usually listen to this one in combination with Reset and Condition after I wake up. It gets my brain pumped and cleared. I felt more energetic after listening to this one time. This could

also be looked at as a helper dose for caffeine-ish effects and further enhance the effects of Condition.

NZT-48: Just like the movie Limitless, this will make my brain become a lot more active than usual. I had so many genius thoughts one after another. Some of them even exceeded my own comprehension and expectation, like I was thinking "Wow, did I really just thought of that?" The thoughts are so crazy that it actually became a little bit unbearable, and kept me awake when I needed to go to sleep. So, use this one when you needed the brain power, and make sure to do a Reset on your brain before going to sleep. I'm serious. I'm still trying to get my sleep schedule back on track right now, it took three listening of Reset to fully clear the effects of NZT-48. I did a comparison of me on NZT and me without. The energy level is a big difference. I poop out and want to lay in bed right after 5 hours of waking up. With NZT, I felt like I could go on for days.

Adrenaline, HGH, JuicelT, Victory: I listened to these in the shorter Sport Enhancement mp3 pack, which are 15 mins for each file. I usually listen to them before a workout, it certainly makes my body feels more ready for a workout. I'm planning to ditch the mp3 pack and download the full DRG version of the doses, which are about 45 mins each. You guys can use this as a replacement for the pre-workout proteins etc.

Telepathy: This one is 1 hour long. I remember that right after I finished it, I started having throbbing feelings in my head, it is like a headache but it is not. The description said that I can send a message to someone, it will be a weak signal if the user was new, but for professionals and masters, they can implement thoughts and mind control. I can't say for sure that will be the case, I did try to send a message to my chosen receiver person while I was listening to this, but I don't know if that person received the message or not. I let the effect of the dose stay in my brain to try to grasp on what it can do, but in the end, I had to use Reset to clear my head after a day since the throbbing feeling made me feel miserable. I will try this one again at some point in the future.

Pheromone: Saved the best for the last. We all know what pheromones can do, we all have the real deal. Right off the bat I would say it gave me confidence, made my dick felt horny, made women looked better and made me want to have sex with them all or at least talk them into it. It sounds like the effects of copulins only without the actual copulins molecule on your body. Everything just felt natural when it comes to women. Even though I say it is similar to the effect of copulins, I would also say that currently there is no pheromone products or combos that is the exactly the same as this file.

That is all the files I listened so far. Try combining After Wake, NZT-48, and Pheromone together for a great day. Do remember to Reset your brain after the day ends though, I don't want you guys to have a messed up sleep pattern.

Just a little bit more in depth review of NZT and Pheromone

NZT: After listening to the track, I noticed that lights are much brighter, my sense of taste had improved, so a possible heighten of senses . I drink Irish Breakfast tea made by Twinings, that tea is very bitter, and can become hard to swallow if you are drinking it for the first time. However, after a blast of NZT to my brain, I can taste the hint of floral within the bitterness that I never tasted it before when my brain is operating at normal conditions. Also, drinking this tea seems to enhance the effects of NZT even further, maybe just drinking tea in general.

Pheromone: The effects I described previously are still there after letting my brain getting exposed to this binaural one more time. But I noticed that the longer you are on this binaural, the stronger the effect becomes. Right after I finished listening, there was a sensation around my penis area, it felt good. Then after that it is the thoughts of wanting to have sex with women and making all women looks better. After a day, the effect becomes me randomly having images of sexy ladies popping up in my mind, some of them are women I know in real life who would never dress in those ways, some are women I saw on TV, internet etc, and some are just fictional, but do have traits of women I had seen or know in real life. The feeling of wanting sex is even stronger, you will still feel good, and it doesn't stop there, this is really a test of limits at this point of how long can you hold it in before Reset.

Maybe one day I will try Condition+After Wake+NZT+Pheromone with some real pheromone products of my own on a date, and see what result I get. Will the Pheromone binaural actually makes you congruent to and/or enhance the pheromone signature of each products?

They also have "Oxytocin", which simulated the effects of Oxytocin, could it also help trigger the natural Oxytocin in your own brain?

I was using Waves ear bud, but it is a bluetooth headphone, it works, I only stopped using it due to it beong uncomfortable in my ear.

I use a wired ear cup headphone now, not a very famous brand, only $20, but it works great. No need to pay a lot of money for an expansive headphone just for binaurals, save that for actual music.

and if the binaural beats doesn't seem to work to you, try getting them again the official way. PM me for the premium version of the software.

Hi Arsenic, sorry for responding so late, I somehow missed your post. I listened to the AM6 file non-stop thru the night as I slept. I played it on my laptop which I placed next to my bed every night. And during the day I listened to it via headphones for a session or two. I listened to each stage for the recommended 32 days before proceeding to the next level. No breaks were taken between each stage. I used two types of headphones; first one are Samsung earbuds that came with my Samsung Galaxy phone, and the other pair are the Sol Republic's Tracks, which are similar to the Beats Solo, but not as bass heavy as the Beats. The volume I used was between 80-100% when I listened to

the tracks thru my laptop, and around 15-20% when I listened thru my headphones.

I thought the purpose of that track was to make your body produce large amounts of pheromones to attract the ladies. Have you noticed anything different in the way women behave around you recently after having listened to the pheromone track a few times?

I thought the purpose of that track was to make your body produce large amounts of pheromones to attract the ladies. Have you noticed anything different in the way women behave around you recently after having listened to the pheromone track a few times? From their site:

I-Doser has created an external reverse pheromone, a breakthrough concept that attracts other through subsection: I-Doser gives you a steady dose of confidence, allure, and ecstasy. A fully complicated binaural formula that makes you feel more attractive. This natural sentiment will make you more attractive to your allure through the quality you will emit after dose.

It seems like not what you were thinking, the binaural seems to be making you feel more attractive and flirty. Some people say it is more like a "sexualized confidence booster". This is useful too, since I can now simulate a pheromone attraction when I am chatting with a female online. The "pheromone" is more like a change of mindset rather than emitting actual molecules from your body. Since we all have the real deal, we can use the products in addition to this and see what happens.

I'll leave that to you guys, the pheromone experts.

masterfu678 - January 19, 2018, 4:02 pm

I think I might have an idea on how the "Pheromone" track works.

It might be a track that simulate our brain and body's response when we saw a really attractive member of opposite sex. Because I know that every time we see a hot girl, we immediately start thinking: "ohh, she is hot/attractive!! I wanna go talk to her and flirt with her", assuming that is what turns you on. The reason why it felt a lot like copulins because that is what mainly makes a female attractive. We also know that if we give a fairly looking female some copulins to put on, she will

equally be attractive.

Could also be what our brain's response when we got hit by the pheromones, which you get every time you put on a pheromone product.

Or it could be a track that tells the brain to make pheromones, like a lot of you originally believe.

Just my theory.

masterfu678 - January 26, 2018, 9:25 pm

Another discovery with After Awake.

This track is 45 minutes, the first 40 minutes are static sounds with a binaural sound that gradually gets more and more pronounced over time, and the static sound fades away with each time the binaural sound becomes louder. The last 5 mins are really loud sounds with no statics, I believe this is the finisher that completely wakes you up.

But you have to listen to the entire 45 minutes to have the full effects of the After Awake. I remember when I was listening to the first 40 minutes, I slowly felt an energy rush in my body, and when the last 5 minutes hits, I felt really awake. I dozed off a couple times, but when the last 5 minutes of the track starts, you WILL be awake, no exceptions. If you want to test this theory, try falling asleep while listening to After Awake. When the last 5 minutes begins, you'll see.

I would also like to retract my earlier review of NZT making me not sleep well. It is was not NZT, it was After Awake, it is like I drank Monster that have an almost infinite amount of energy rush. So if you want to sleep, you HAVE to do a Reset or three times.

Hey, i'm creating a large idoser folder on Mega.nz with all doses i have(222 doses), they are in mp3 format and in unlinked drg and sbg format as well, and yes you can unlink a dose from your pc, or send to someone(i can do this if someone have a drg file that i don't have and get a mp3 file of it, wav is usually heavier than mp3) to unlink them.

i saw that there is some link of wav and mp3 files that i don't have(attract pack, and some others in mp3 in a mediafire folder), if someone have the drg to them please send me a private,email me or reply this post, the drg can be linked to the computer i'll unlink them if necessary

@ IdoserPiracy; Thanks for making your files folder available to all members on this thread, and reps to you as well

P.S. Isn't it better to just upload the files in their original drg format to save valuable space? Then all that's needed is for members to download the drg files they are interested in, and convert them into mp3 files using the copy of I-Doser Premium software provided by masterfu678.

So let's talk about Telepathy, here is the description on the i-doser site.

"This is a great addition to our highly popular spirit line of doses. Telepathy helps open channels to achieve mind to mind communication, and with practice can help achieve links between multiple minds. This is a good starting dose to help tune and practice psychic powers. You should choose a receiver before administrating the dose, and concentrate on the message you wish to send to your receiver both before and after dose administration. Beginners may only be able to send weak signals to their receiver, while masters may reach multiple receivers and possibly achieve thought implanting and mind control."

I bolded and made those words red because that is the main thing we are talking about here. I'm gonna do this in the normal pheromone review style, but we are reviewing binaurals.

So I did have a couple targets, one is JM, and another one is ER. JM is a caucasian female that I had been trying to befriend with but it is very difficult, I even used a whole bunch of pheromone products around her and her behavior still didn't change much. She is another one of those tough nut to crack.

ER is a beautiful Colombian female, she is also my co-worker, and drove me to work a few times. She is a girl that does things by tradition and can't tolerate people being impolite, also she is really well mannered.

I listened to Telepathy only once, while I was listening, I first chose JM as my target. I meditate and thought about her, and repeated my intentions of wanting her to be my friend over and over again. Now, you can't expect this to be blatant, as thought implementation or mind control happens in the subconscious mind, you don't know if the target are affected until they show a behavior change. The next time I saw JM, I have noticed that she was warmer to me than usual, more friendly, and it was easier to bond with her, perhaps the intended purpose of Telepathy worked?

I let the effects of the binaurals stayed with me for a day. When my brain was on this binaural, I had this throbbing headache that doesn't go away, it is like my head are about to explode, but not. If you guys listened to this, see if you have the same effect.

Onto ER, the same day after I listened to the binaural and letting it stay with me for a day. ER was driving me to work, and I decided to test the Telepathy on her, so I tried to implement a thought in

her to wanting be my friend. She didn't have any reaction at the time, so I thought Telepathy didn't really work on her, and gave up. But, just a couple day ago, when I was at work, my co-workers were teasing me, and ER just blurted out "stop being mean to my man." Everyone in the room opened their eyes with surprise, and some of them even said: "lol masterfu, she said that you are her man." ER then said: "I use this term loosely." Which further brought more surprised faces. Personally I think she was trying to cover up her feelings, only time will tell.

I was not wearing any mones that day, or on any binaurals, not even the Pheromone binaural, just myself. I think ER's behavior that day might be the result of my thought implementation I did a few weeks ago. But overall, Telepathy is really a different animal to tame. It is like we are trying to be someone who has psychic abilities, but we don't know what they feel like since not everyone has the psychic gift.

I uploaded Confidence earlier. I'm about to upload Adderall and chakra for you I don't have the others that you linked to, but if you are willing to pay for them then PM me with the files and I will convert them for you.

I'm in the process of converting about a dozen more for you guys. Most of the idoser files in my mediafire have been downloaded 30+ times so I'm guessing a few of you like them Can i download it for free? I tried from the mediafire, and it says that i got to pay or create an account if its over than 10 GB.

What should i do?

DssMaster - March 24, 2018, 3:00 am

Haven't had the chance to put any of the I-doser files to the test. Only gave a quick run just to see what they are like, but when I did I was sitting on my computer, not laying down as it is recommended to do. At the moment I am testing some subliminals by a different maker.

I did finally get a pair of Sennheiser HD 280 Pro's headphones, and I gotta say...they are certainly worth the $100 I paid for them on Amazon. These headphones are not bass heavy as the Sol Republic Tracks headphones I own. But I actually prefer them not bass heavy, as those type of headphones usually muffle the other frequencies as a result. The 280 Pro's are much more comfortable to wear for longer periods of time as well, as the ear muffs sit around your ears, and not on top of them like the Beats and Sol Republic Tracks do. Another plus about the Sennheiser pair is that they provide better sound/noise isolation, as they provide a better seal around your ears, which the other brands mentioned do not.

And one thing I discovered about the 280 Pro's, is that you can make them a bit bass heavy if you play with the equalizer settings in your computer/audio system. Most mp3 players don't have a way to adjust the different frequencies, but I can do so when I play music on my PC.

The trick is to give them a proper burn in, usually done by letting them plugged into your computer/audio system playing music non-stop for a couple of days. I did that for a couple of nights when I first got them. And I must say, the bass seems deeper, and definitely much cleaner than what you get on the Beats or Sol Republic type headphones. This particular model, the Sennheiser HD 280 Pro has been around for close to a decade now, and I can see why, because they have definitely proven themselves in the industry, and are a favorite for studios and DJ's alike.

The only negative I have to say about them, is the long heavy cord they come with. But then again, that is only a negative if you choose to use these with your mp3/smart phone when you're out and about. The reason for the long cord is to give the user freedom of movement when in a studio or DJ environment, which is what they were originally designed for. Would be great to see Sennheiser make a remake of this same model with a jack connector to allow the user to choose and switch the cord type and length, just like some headphone manufacturers (Sol Republic Tracks) are doing nowadays.

So I would like to remind everyone that you do not stack too many effects of binaurals at once.

I had Condition+After Awake+NZT-49+Condition+Cerebral Activation+Telepathy all at once, and I thought I could just get the 1 hour Telepathy session over with and Reset, but I felt like I can't even breath, it is that kind of feeling where you ate too much food or after a really hardcore workout, my chest just felt heavy and something was pressing on it. I had to stop Telepathy midway and Reset. The first few minutes of Reset, I immediately felt a lot better, I listened to Reset twice just to be sure that my brain was cleared of all the effects.

So yea, this is kind of like a review of Reset, it does wonders when you need to return to your normal self or when you are struggling due to stacking too much binaurals.

Also, I mentioned a new binaural I acquired in this post, Cerebral Activation. It is supposed to activates your brain and improve all functions of your brain (speech, memory etc). I-Doser said that it can also help open your Third Eye. I think a Condition+Cerebral Activation+NZT-48 is a great combination, haven't tried it yet but I just have this feeling. Also Condition+Cerebral Activation+Telepathy, I did try this one, I had an easier time focusing on the thoughts I want to send to my receiver(s), felt like it was a breeze.

Keep us posted if you try that combo you mentioned. I already have a scenario planned out where I try this. Playing RTS games such as Starcraft 2. This game might had appeared in the media a couple times since South Korean are hardcore about it.

To be competitive in this game, you need fast reaction and excellent multi tasking skills plus good strategies. So I could see that this combo would work since my brain will be enhanced. I would improve but probably not to the point of those eSports pros.

DrChocolate - April 12, 2018, 12:41 am

Am starting to see how these work, but am still learning. A lot of the pure drg files don't work on me for some reason. But Ecstasy quick hit played in me phone DEFO works for me. Gives me the mdma effect and I KNOW how mdma behaves on me. To test this even more, I fapped purposely multiple times and then listened to it again. And yep, am horny again. Lol. So yeah, it works.

The trick for me that works, is, I have to concentrate on the vibrating sound. NOT me breathing, NOT me heart beat, NOT me count down or up. But the vibrating sound. But unfortunately, I can only conclude that ecstasy QH is the only one that does work for me in a logical sense I can

comprehend. I tried the same method with Crystal Meth full drg file. And it didn't work. Same test strategy. Am still learning.

If I can get these effects with these Binaural beats without ACTUALLY DOING these drugs, man I found a massive gem. I can do them and not worry about me drug tests am doing at work. Smile

A massive thank you for Arsenic the OP for sharing this.

DrChocolate - April 27, 2018, 9:40 pm

Pasted from me journal

I-dosers

Am STILL learning these, but I find the shorter the clips are, the more effective they are for me.

Also, volume level has a significant impact for the efficacy. And it seems low medium is the perfect level for me. If I'd go from 0 to 10 I'd say 4 is the best optimum level. And I tried different sound settings and amplification of the sounds. Seems to me it's better if those settings and amplification are COMPLETELY switched off.

When I bought the premium software, they gave me a few doses for free. "French roast" being one of'em. And it's only 5 minutes long. It's similar to a coffee shot for me. "French roast" I-doser plus a banana in the morning after a 4 to 6 hour sleep, wakes me up to full swing. And that's WITHOUT a coffee.

I find the longer the i-doser clip is, the less effective it is for me. The phone software has shorter versions of i-doses, and they work better for me. Except the fact that they have songs layered on the dose and quiet frankly, I wish they didn't do that. Cos them songs're annoying TBH. That's for me though. Could be different to u.

From my response to you in PM.

Well, I can't really tell. I end up doing Condition+Cerebral Activation+Telepathy on ER for a week straight, about 2 hours and 5 mins for each session, then I stopped because I did what I had to do and moving on to a new girl, also the sessions really drains me. You can't really tell unless you can read their minds and have psychic powers, this is not like the pheromones where the hits can be seen physically.

But she was friendlier toward me than usual, and she didn't get hit much with my pheromones.

masterfu678 - June 8, 2018, 8:34 pm

Ok now it is time for Condition+Cerebral Activation+NZT-48 review.

So yes, a very good combination, not only did my five senses improved, speech was extremely clear and precise in expressing my thought process. Plus the effect of NZT-48, which also gives me great idea.

But of course, if you don't know how to do something in the first place, this binaural combo won't change anything.

I tried this combo before taking a test called the DLAB. It is a test for the US military to test your ability to learn a foreign language, with a made up language (gibberish). It is pretty hard, and even with this combo, I still can't understand 70% of the questions on the test. This test is not something that you can study, so that is that. You won't suddenly be passing this test just because you enhanced your brainwave with binaural that simulate a fictional smart drug.

However, if you DO know how to do something, then this combo will make you do that thing a whole lot better., you are smarter, you are stronger, you are better.
