Thread: Pheromones for Older Guy Younger Gal

Johnny Fever - July 22, 2019, 6:01 pm

Ok, here's the skinny: Mid/late 50s guy has a workmate, she's approximately 30, whom I only bump into a fairly rare occasions. Started building a rapport with her on a string of visits late last year and somehow along the way I must have inadvertently alienated her. However, this was months before I became reacquainted with pheromones.

As chance would have it I'll be working with her on a short couple of hour assignment later in the week. I know 'mones aren't the cure-all by any means, but I'd love an edge into possibly mending things or even rebuilding a connection with her. While I have to admit I wouldn't mind getting physical with her I'd be happy with a dandy piece of arm candy as she's bright, intelligent and personable, which is something many of the women I've run across in recent weeks seem to lack.

Since I doubt I'd have enough time to order anything new I'll provide a brief overview of what I have in inventory and perhaps the veterans in the group might give some learned advice. BTW: most everything I have is unscented except those which only come scented without choice:

LAL - NudeAlpha, Bad Wolf, Aqua Vitae (full size), SXD-9, Dirty Primitive, Possess (samples)

LPMP- TLG (spray and roller), Elementary, Ch. 6 w/ Phero B2.2, Hot Cherry w/ phero, Year One w/ phero (samples)

PT - Captain (oil), Hookup, GOA

PXS - Bliss, Ascend, Evolve, Taboo, Xist, SOB, Cohesion (all sprays), Aura of Amity (sample spray)

I've been experimenting on my own when I'm out and about but have only noticed lol's on rare occasions so I'll admit dosing advice would be well received as well. Thanks in advance to the group.

PT - GOA

PXS - Taboo, Cohesion (all sprays), Aura of Amity (sample spray)

From what you have, any of those above would give you a decent boost towards the lovey-dovey. Assuming NOT TLG, I'd go with NA, DP or Possess, GOA or Taboo. All of the ones I quoted above have their pluses, and in different ways; the ones I said I'd go with just jibe better with my particular style.

Test.of.Sweden - July 22, 2019, 7:19 pm

I would go with 6 sprays TLG, but its hard to guess what would work best.

dsouza - July 22, 2019, 8:06 pm

I'm an older guy (over mid forties) and I've dated half a dozen 9's (mid 20's to early 30's) in 2017 and had hotel sex with several of them with nothing more than m3x. In the end your game will rule. Mones are an assist. If you can't get laid without them, you probably won't get laid with them either...

Johnny Fever - July 22, 2019, 8:26 pm

Thanks for the good advice, folk. My worry was that I had gleaned here in the forums that some mones are more off-putting to younger women and I didn't know if approximately 30 (could be as young as 28) would have any potential negative side effects or not.

I know this is a somewhat impossible question to answer, but what do you think the difference in your success would have been if you did not have mones/m3x?

M3x made conversations smoother during dates and the women more disinhibited during sex. It also melted last minute resistance. I would say it upped my success by 15% which is saying a lot. This was my 2017 batch.

I still needed to have my game in place. Know how to write to women, know how to text and phone, know which restaurants and hotels to go to in varying cities. Know how to time sex pills etc. This is all part of game and has nothing to do with pheromones. But M3x enhanced all interactions as if I had a silent wingman guiding me.

avi - July 23, 2019, 6:07 am

For me TabooXS spray + Core was an amazing combo to influence the young girls. Taboo has properties to affects younger girls even under 17... I was wearing regularly Core, Taboo at 2sp each plus addition of Evolve(1sp or d) sometimes.

The others product is also very good for You. Like M3X...

And the new one - TLG spray is one of the most promising pheroblend.

Snoopyace - July 23, 2019, 6:31 am

For what you are looking to accomplish and what you have on hand, I would really suggest The Love God. Just put it on, forget you are wearing it and then go have fun. With The Love God sheâ€™™ll lead you wherever sheâ€™™s ready to take you.

Johnny Fever - July 23, 2019, 7:02 am

Thanks, everyone. I think I was more concerned with repelling away due to using an incorrect product but I'm glad to hear there's things I have that are suitable. If nothing else it will be yet another experiment in my journey with mones.

For what it's worth, I have been interacting with a cute little long-haired brunette, of gaunt, but well formed, figure of the lowly age of 22; primarily while only wearing TLG.

Without sounding like a braggart, I pretty much have her deep under my spell. TLG works well (can work well if can dance the dance) with the younger ladies for me, but until they're a bit more worldly I tend to pass.

TheManInTheFedora - July 23, 2019, 2:14 pm

I would suggest TLG as in my beginning forays with this last Fall, I've had a young college age chick clerk (18 - 22) in fast food counter, open me in conversation...dilated pupils, marveling at my name spelling (the spelling is not so unusual at all!)...the chick was gushing talk, motormouth effect. She was primed for escalation. All I had to do was ask for her number or propose a drink offer after her shift ends. By the looks of her body language/euphoria, the probability seemed favorable that she'd comply.

I am almost 48 years old. I used the alcohol spray, kingmaker scent....6 sprays usually to sides of neck, adam's apple, tops of hands. At the time of encounter, the application had been approx. 3 hours old.

Good Luck!

lunch - July 30, 2019, 7:48 am

Seconded the Taboo Suggestion. It gets the young girls flirty and giggly but you will need to do some groundwork/game at your end too which isn't difficult as it will put you in a good mood as well. 1-2x sprays to the neck worked for me.

As lethal as n.a. is it needs more exposures imo.

Captain would probably serve you best.

Goa is deadly and goes VERY WELL with the hookup(aka the hug).

I love sob but not it's not really work safe in most professions.

Xist/cohesion could work too.

If possible, you should get some p75 and p96 to have on hand at all times... (07-22-2019 1:01 PM)

Johnny Fever - September 22, 2019, 4:49 pm

Been laid up due to a recent physical injury and surgery but look forward to honing in on perfecting things. Unfortunately my original target is long gone but that just gives me opportunity to work new people not already familiar with me.

Gladen - September 25, 2019, 7:31 pm

Sorry to hear about your injury and the complications thereafter. I hope you are doing quite well and fully recovered, or at least on the path to full recovery.

Johnny Fever - September 26, 2019, 7:42 pm

Thanks, Gladen. Currently working with one arm but managed to employ Siri on the Mac so I can type replies into the forum. Starting to go a little crazy with cabin fever considering I'll be out of work for 4 to 8 more weeks.

Luckily there's many things here on the forum to read and learn from, and your journal is among the Mehdi I enjoy whenever I'm here. Everyone offers wonderful insight which I hope will help my own game.

Gladen - September 26, 2019, 7:55 pm

That should have been MANY - guess I didn't catch the Siri misspelling! Just when I thought it was going to save me from typing with one hand

Gladen - September 27, 2019, 12:53 pm

(09-26-2019 8:34 PM)Johnny Fever Wrote: [](#)That should have been MANY - guess I didn't catch the Siri misspelling! Just when I thought it was going to save me from typing with one hand Although the joke of misconstruction is on me; you have to admit that it was one serendipitous typo! Mehdi is an Arabic name that roughly translates into "the guided one". When you said that [my] journal is one of the Medhi that you enjoy; I felt that it was intended to imply that you found it insightful...

(insert a Gladen's self-absorbed ego joke here)

As far as typing with one had goes; other than making a silly masturbatory joke, I can only wish you a speedy recovery on that. I (academically) understand what it must feel like to experience that sort of temporary handicap.

Johnny Fever - September 28, 2019, 1:23 am

I indeed have found your journal quite insightful. It also lends to a little frustration on my part, as similar products in my hands don't garner anywhere close the same results you've had. Having relatively recently becoming reacquainted with pheromones I'm admittedly a newbie and need to

focus on the sweet spots of certain products.

On a sidenote, I noticed I need to over emphasize what I'm speaking to Siri as far as dictation goes - it seems a minor mumble will cause it to detect words I had no intention on typing / speaking.

As far as my injury goes I am barely 2 weeks past surgery with another 4 to 8 week disablement projected. While cabin fever has truly set in I find your journal and the rest of the site here quite informative.
