Hi

I am African\European and i got both of those. Only used AM one time, and it made me very confident but a bit too arrogant and aggressive. Still have to test it in the club.

With 9+O i had great results, actually the reason i dont test AM more is because of the excellent results with 9+O. Lately i apply it right before interactions (cause of the Oxytocin) and i got big hits. It looks like it works good mixed with other products like Glace.

I am actually curious about other people opinions on these 2 so i am glad you made this thread

:good3:

man no one else replied so i just went ahead and purchased Wingman 9+O i hope it works, for \$70 it better work lol

This is by far the most expensive mone I've ever bought lol hopefully it arrives in plain packaging lol my dad will kill me if he found out i payed \$70 for "cologne" instead of saving towards paying for the college books i need this upcoming term lol, well i can always get the \$70 from him

Yep, i hope it works for you, but i gotta say when i bought it a few months ago they were running a discount, so i just had to pay 50 % of the real price. Even tho i am getting great results idk if i will buy it again, just because of the price but i love the results.

Good Luck

Sorry edt spray:

What is the difference between Perfume, Eau de Parfum, Eau de Toilette, and Eau de Cologne?

The differences are simply a matter of the amount or concentration of oils in the fragrance. These oils are called "juice." The highest concentration of "juice" is in perfume (or parfum). Next would be Eau de Parfum, then Eau de Toilette, and finally Eau de Cologne.

LoveDocta - August 8, 2011, 9:56 pm

So edt stands for Eau de Toilette? Right

And isn't Armani Code a Eau de Toilette?

Code has no range what so ever and I only get compliments when I'm really close to a person. Meaning it's nothing special. You want people to be able to smell your scent from minimum 10 feet away and be like wow what's that scent and who's that wearing it. The scent of the cologne is what carries the pheromones to them. It rides on the coattails.

On my trip to LA I actually purchase 2 extremely rare & pricy scents from a boutique stars shop at. I wanted sometime women won't smell everyday and something not everyone has to use as my signature scent that everyone will know me by from now on.

I won't tell what they are

"Lets just say it's like they are pheromones themselves women turn around and look at me with just them on without the mones. 1 spray of each and that's all it takes. Cost me almost 3k for just the 2 of them luxury crystal bottles.

They are (Eau de Parfum)

Once I use as a cover scent for my mone mix I shall rule the world.

The range is so vast that I can fill the whole room but the scents. However they are light enough not to over power people. The scents stay in the room you leave for a while that's how powerful they are.

I have never had Deer in the headlights from just a cologne until I got these scents.

SeriousSmile - August 22, 2011, 1:00 pm

I wonder, for a 3k cologne, how big is the bottle? Tank size?

One man's 3k is another mans $300.00 or $30.00.

You must shop according to your level of income. I have seen colognes that are 15k in Dubai they are custom made for you.

You can get some really good ones in the $200 to $400 range. That range will put you above 98% of guys won't buy because the price which will make you stick out like a sore thumb to ladies which is a good things.

I wish I made to much. My neighbours car cost more then I make a year. In my area I'm actually small fries. I had to transform myself to get over that point.

Pheroman - August 23, 2011, 1:49 pm

You can buy Clive Christian products for under $300.

ppHamelin - August 25, 2011, 6:42 am
